—Ron Coniglio's class

"If you have a dream in your heart, don't let anybody stop you."

Joyce Guy-Harris
Outreach Coordinator

Joyce Guy-Harris, a welder by profession, and Outreach Coordinator for the State Building & Construction Trades Council, talked about jobs in the construction industry with students in Ron Coniglio's ROP Construction Technology class at Pittsburg High.

"Construction is one job you can't outsource," she said, and predicted that

over 140,000 construction workers will be needed in California during the next 10 years.

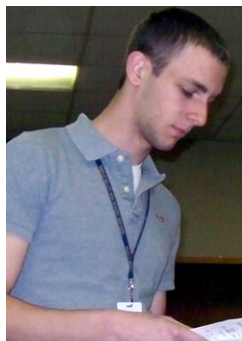

She told the class, "If you are in this class, you are learning a gift." Her presentation was inspiring, and ended with, "No matter what you want to do in life, you want to leave a positive legacy. If you have a dream in your heart, don't let anybody stop you."

—Mickey Wharton's class

Brian Youell, in Tim Bruder's ROP Auto Technology class at **Alhambra High**, will be joining the Marines after graduation

Jessica Slaney
ROP Auto
Technology
Alhambra High
—Tim Bruder's class

Jessica Slaney participated in an internship at Concord BMW last summer, and hopes to work at another BMW dealership while she attends college at San Jose State next fall. In Tim Bruder's ROP Auto Technology class at **Alhambra High**, Jessica says, "I learned how to take apart a motor and put it back together with no parts left over. I would recommend this to any girl. You learn a lot about cars, so you don't waste your money."
