

# Acknowledgments

---

The 2003 Contra Costa County Children's Report Card represents the coordinated efforts of many individuals. We especially thank the members of the Project Oversight Committee, who had a major role in overseeing the work of this report from initial discussions about outcomes, through indicator selection and refinement, to interpretation and presentation of findings. In addition to the Project Oversight Committee, more than 20 community service providers and professionals contributed valuable expertise to help us develop our list of indicators. We acknowledge the valuable contributions of the Executive Committee of the Contra Costa County Children and Families Policy Forum. We would also like to acknowledge the Applied Survey Research project staff, who worked diligently on all aspects of data collection, analysis, and report production.
